About This Guide

This guide showcases our brand identity, which consists of all the visual elements that represent and distinguish our brand in the minds of consumers, stakeholders and the broader public.

It's more than just a logo; it's a cohesive system of visual components that work together to create a consistent, recognizable presence across various touchpoints. Our visual identity conveys brand personality, differentiates us from competitors and builds loyalty and recognition.

You play an important part in executing our brand identity. To help us create a seamless brand experience, please follow the guidelines provided. Our brand's success hinges on the consistent application of these guidelines.

Consider this guide an evolving document. As the brand grows, new instances and guidelines will be added to create a single source of truth.

If you have any questions regarding application or guidelines, please reach out to Richard Gonzales at Richard.Gonzales@csiweb.com.

Brand Story

CSI—much like its customers and the financial services industry as a whole—is no stranger to change. We’ve seen plenty of it in our nearly 60 years in business, from recessions and increasing regulatory pressure to digital acceleration and the rise of fintech and open banking. In that time, CSI has partnered with hundreds of community financial institutions and regional banks across the country to meet the evolving needs of account holders, communities and the institutions themselves. We’ve done it every which way: through core migrations, open banking integrations, modern payments and lending solutions, AI-enabled regulatory and compliance tools, managed services and cybersecurity.

But it’s *how* we’ve done it that sets us apart.

Because as much as the financial services industry has changed in the last half-century, there are still so many things that remain the same, things that are just as important as a product’s feature sets and time to value.

The common denominator that isn’t just prevalent in, but critical to, every area of financial services has been—and will always be—the relationship that exists between provider, institution and account holder. We know the value that comes from great relationships that emphasize transparency and honesty. These are words rarely used when talking about a solutions provider, making it all the more important that we embrace them at every opportunity, in every customer interaction, in investing in our team, in every internal discussion and in every decision we make about products and services and innovation.

It’s who we are. It’s why we’re unmatched in relationship-driven financial services. And it’s a foundation on which we and only we can build a better future, create even better products, deliver even better solutions and rewrite what it means to innovate. Because if 60 years have taught us anything, it’s that customers want innovation, but need great service. It’s our mission to give them both.

CSI Elevator Pitches

An elevator pitch is a short and simple explanation of what CSI does and who we serve. If family, friends or someone you just met asks you about CSI, this is how you'd answer them and give a quick rundown of what we do. We've included a general elevator pitch for CSI and several pitches for specific lines of business.

General Pitch for Anyone

CSI is a software and technology company that partners with community banks for everything they need to operate and grow. We're all in on community banks and provide core banking software (think everything from the bank's system of record to the digital banking app on your phone) and enable them to stay protected against cyber threats and financial crimes (like fraud and money laundering).

Essentially, we make it easier for people to interact with their bank on any platform they choose and ensure every interaction is seamless and secure.

For Credit Unions

CSI is a software and technology company that helps credit unions stay safe against evolving cyber threats (like data breaches and account takeover), boost their system performance (with secure, compliant IT environments), stay compliant with evolving regulations (using real-time, automated sanctions screening software) and fight financial crime (like fraud and money laundering).

For Financial Crimes

CSI is a software and technology company that partners with community financial institutions and other regulated organizations to fight financial crime (including fraud and money laundering) and stay compliant with evolving regulations (using real-time, automated sanctions screening software).

For Doc Services

CSI is a software and technology company that helps financial institutions build relationships and stay connected with their customers using secure, multi-channel document distribution services (that's everything from print and mail documents to personalized digital statements).

For Hawthorn River/Lending

CSI is a software and technology company that partners with community financial institutions across the country to provide everything they need to operate and grow, including a modern lending platform that's built specifically for them. Our LOS streamlines the often complicated lending experience (by reducing friction throughout the consumer and commercial lending process) with a configurable end-to-end platform.

Our Purpose

Our Mission

We deliver comprehensive solutions and open technologies that empower community and regional banks to achieve their distinct goals.

Our Vision

We will cement our position as the preferred partner and help shape the future of banking by fueling growth and retention for our customers and delivering solutions that enable them to rival every competitor.

Our Values

Embrace Ambition

- We intentionally seek the best for our customers and each other.
- We create technologies our customers truly need.
- We encourage unconventional thinking.
- We pursue opportunities for purposeful change and growth.

Ask yourself:

- “Are we innovating just to innovate?”
- “Is this directly adding value for customers?”
- “What will this investment in time, money or resources contribute now and in the future?”

Avoid:

- Complacency.
- Acting before thinking.
- A “this is how we’ve always done it” mindset.

Celebrate Integrity

- -We support one another.
- We lead by example.
- We provide open and honest communication to each other and our customers.
- We celebrate doing the right thing.

Ask yourself:

- “Is this realistic and achievable?”
- “What are the potential negative outcomes for us or our customers?”
- “How can we help (our customers and each other)?”

Avoid:

- Under-communicating.
- Acting passively.
- Stifling collaboration.
- Shying away from difficult conversations.

Work to Serve

- We invest in long-term success of our employees and our communities.
- We have a history of reliable, exceptional service built on relationships.
- We are a part of something bigger than ourselves.

Ask yourself:

- “How can I best serve my customers and colleagues today?”
- “How can I make a positive impact?”

Avoid:

- The easy way out.
- Treating people like numbers.

Our Rally Cry

We're All In

All in on:

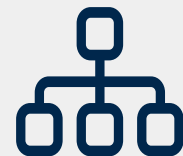

Embodying our commitment to community.

Creating an environment of collaboration and appreciation.

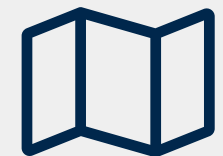

Providing unparalleled customer experiences.

Embracing organizational evolution and personal growth.

Promoting nimble and efficient time to market.

Advancing the product roadmap.

Brand Voice

Our brand voice is the personality the CSI brand takes on in all of its communications. Our brand voice serves as a guide of what to say and how to say it. Our voice is unique to CSI and helps us stand out from the noise by reflecting our company values, including embracing ambition, celebrating integrity and working to serve.

For a brand voice to be effective, it should be:

- **Consistent:** Maintain uniformity across all platforms and messages.
- **Genuine:** Stay true to the brand's core values and identity.
- **Relevant:** Address the needs and interests of your audience.
- **Engaging:** Captivate your audience's attention and fostering a connection.
- **Memorable:** Leave a lasting impression.

Our brand voice is:

Authentic

(we are clear, concise and engaging)

Conversational

(always appropriate and respectful)

Helpful

(but never overbearing)

Confident

(but never over-promising)

Characteristic	Description	Don't	Do
Authentic	We care about our customers and helping them achieve their goals while celebrating integrity.	- Don't use too much jargon or appear too sales focused. - Don't rely on over-used or generic phrases.	- Write in a clear, direct way. - Be concise.
Conversational	We want to create long-lasting relationships with our audience by speaking to them in a friendly and engaging way.	- Don't use passive voice. - Don't appear unprofessional or too casual. - Don't use too many exclamation points.	- Use contractions and "you" and "yours" instead of "them" or "theirs" (when applicable). - Use active voice. - Use humor or witty phrases when appropriate. - Consider breaking up large blocks of text with bullets (when applicable).
Helpful	We want to empower our customers with relevant, accurate content and information that aligns with our value of working to serve.	- Don't only focus on product features. - Don't make it all about CSI (focus on the customer).	- Acknowledge the problem that needs solving. - Focus on the outcomes of our solutions or services from our customers POV. - Use clear, actionable CTAs.
Confident	We believe in our thought leaders—as well as our relentless pursuit of ambition—and want to position ourselves as a trustworthy, knowledgeable authority in our industry.	- Don't oversell. - Don't use vague terms. - Don't be overbearing or brag.	- Be straightforward. - Use strong, decisive language (e.g., helps instead of can help). - Use statistics or facts to back up your statements when applicable.

Authentic

We care about our customers and helping them achieve their goals while celebrating integrity.

BRAND VOICE CHARACTERISTIC EXAMPLES

Don't	Do
• Don't use too much jargon or appear too sales focused. • Don't rely on over-used or generic phrases.	• Write in a clear, direct way. • Be concise.

Authentic Examples

DON'T: In today's digital-first world, technology is changing fast and shaped by various factors.

DO: Today's technology landscape is driven by evolving consumer preferences and increasing competition.

- ✗ Generic, over-used phrase
- ✓ This sentence is more direct and specific.

DON'T: CSI's EBG products will allow community bankers to grow their deposits and achieve their goals. Our robust, industry-leading technology can also help banks foster engagement with their customers.

DO: CSI's modern software and open technologies empower community banks to grow their deposits, achieve their goals and engage with their customers.

- ✗ Acronym/CSI jargon that not everyone may know
- ✓ This is written more concisely than the example on the left.

Conversational

We want to create long-lasting relationships with our audience by speaking to them in a friendly and engaging way.

A note about using humor: There is a difference between being funny and being silly. Funny refers to a joke or witty remark that makes you laugh or feel amused. Silly refers to something absurd, wacky, foolish or lacking in common sense. Avoid being silly.

BRAND VOICE CHARACTERISTIC EXAMPLES

Don't	Do
• Don't use passive voice. • Don't appear unprofessional or too casual. • Don't use too many exclamation points.	• Use contractions and “you” and “yours” instead of “them” or “theirs” (when applicable). • Use active voice. • Use humor or witty phrases when appropriate. • Consider breaking up large blocks of text with bullets (when applicable).

Conversational Examples

DON'T: CSI Hosted Voice enables your institution to optimize its communications from any location. Our solution allows you to add or remove services as needed and connects locations seamlessly. It also incorporates audit and security protections.

DO: Modernizing your phone service with CSI Hosted Voice enables your institution to:

- **Optimize its communications from any location**
- **Add or remove services as needed**
- **Connect locations seamlessly**
- **Leverage audit and security protections**

DON'T: Instructions will be given to you by the director.

DO: **The director will give you instructions.**

DON'T: UDAAP and UDAP are two distinct regulations with various implications for financial institutions. Our blog explains the nuances of each and provides actionable recommendations to avoid costly violations.

DO: What's the difference between UDAAP and UDAP? **Spoiler alert: It's more than just a letter.** Read our blog to learn more and find out how to mitigate your risk of violations.

- ✓ Breaking this up into bullets makes it easier to read than a block of text
- ✓ Use active voice instead of passive, which means using action verbs instead of “is” or “be” verbs.
- ✓ Use appropriate humor to draw the reader in and make topics more exciting.

Helpful

We want to empower our customers with relevant, accurate content and information that aligns with our value of working to serve.

BRAND VOICE CHARACTERISTIC EXAMPLES

Don't	Do
• Don't only focus on product features. • Don't make it all about CSI (focus on the customer).	• Acknowledge the problem that needs solving. • Focus on the outcomes of our solutions or services from our customers POV. • Use clear, actionable CTAs.

Helpful Examples

DON'T: Generic calls to action like: **Learn More**

DO: Specific calls to action like: Let's Talk, Watch our Webinar or Strengthen Your Security

DON'T: Our Hawthorn River lending platform includes features like workflow management, order automation and tax-form spreading.

DO: Simplify your lending operations, deliver a seamless digital experience and increase efficiencies with our core-integrated loan origination solution.

✗ It's okay to use this as a call to action sometimes, but always try to use more specific ones.

✗ This sentence focuses on our solution and specific features rather than what the solution does for the customer.

✓ Leading with what we empower our customers to do

Confident

We believe in our thought leaders—as well as our relentless pursuit of ambition—and want to position ourselves as a trustworthy, knowledgeable authority in our industry.

BRAND VOICE CHARACTERISTIC EXAMPLES

Don't	Do
• Don't oversell. • Don't use vague terms. • Don't be overbearing or brag.	• Be straightforward. • Use strong, decisive language (e.g., helps instead of can help). • Use statistics or facts to back up your statements when applicable.

Confident Examples

DON'T: Our solutions can help your institution.

DO: Our solutions **empower** your institution.

DON'T: Today's consumers are **more digital than ever**.

DO: **Nine out of 10 consumers** say they will leave their bank if the digital experience is disappointing.

DON'T: **CSI is better than the competition because we always innovate and never let our customers down.**

DO: As a winner of the 2023 "Best Core Banking System" from Fintech Futures, **CSI is committed to meeting the needs of our customers.**

✓ Make sure your language and verbs are as strong as possible.

✗ Could be considered vague

✓ Relevant stats help drive your point home, making you a confident, credible source.

✗ While the tone of this is confident, it's also bragging and overselling. A good rule of thumb is to avoid words like "always" and "never."

✓ This delivers the same message but provides evidence and does not oversell. It also positions us as a leader in the industry.

Brand Voice Tips

Stay true

Any communication should reflect our brand voice in both the words and the tone used to communicate.

Conversational and friendly

Use a style that is both engaging and welcoming.

Be consistent

Tone might fluctuate somewhat between channels. Emails may be more formal, and social media may be more casual. However, we do have a specific tone to serve as a unifying factor.

Show empathy

Show customers that you understand how they feel by using language that conveys empathy, discussing their challenges and pain points.

Be clear

Communications should be easy to read and understand.

All customer interactions should reflect these attributes, ensuring alignment with our brand's overarching message.

CSI Products – Registered Names and Trademarks

When using a registered or trademarked product name, please include the ® or ™ symbol upon first mention. After that, you can drop the symbol in subsequent mentions.

Commonly Used Words

While there are different accepted spellings of the words below, please use the form listed below for consistency.

- cybersecurity
- cybercriminal
- cyberattack
- fintech
- website
- webpage
- email
- watch list
- data center
- eSignature
- blockchain
- cryptocurrency
- real-time (if used as an adjective) or real time (if used as a noun).
 - CSI offers real-time monitoring.
 - We monitor your network in real time.
 - This also applies to on-demand vs. on demand.

AP Style Guide Tips

Date and Time

- Dates should be written as Monday (day), July 1 (month + date), 2024 (year).
 - **Example:** Monday, July 1, 2024.
- Times shouldn't have colons for times on the hour (e.g., 3 p.m., **not** 3:00 p.m.).
 - When writing a time, a.m. and p.m. should be in lowercase with periods.
- Omit "st", "rd", and "th" from dates (e.g., July 1, not July 1st).
- Spell out names of months when not used for a specific date. Abbreviate Jan., Feb., Aug., Sept., Oct., Nov., and Dec. when writing out a specific date (e.g., Aug. 3, 2023).

Numbers

- Spell out numbers one through nine and use digits for numbers 10 and higher.
- There are a few exceptions to this that should always use digits, including addresses, monetary values, dates and times, percents and dimensions.
 - **Example:** Only 9% of bank customers don't use digital banking.

Punctuation and Capitalization

- Use a single space after a period (i.e., no double spacing between sentences).
- Use commas to separate items in a list, but do not place a comma before the conjunction in most simple series (e.g., *Community banks are wonderful, great and fantastic*).
 - However, if omitting that final comma could lead to confusion, then include it for clarity.
- Capitalize the first word after a colon only if it is a proper noun or the start of a complete sentence.
- Use parentheses sparingly. When you must use them, place a period outside the parentheses if the text inside is an incomplete sentence (such as this fragment).
 - If the phrase in parentheses is a complete sentence but remains dependent on the surrounding material, do not capitalize the first word.
- Use periods in abbreviations where applicable (e.g., *U.N.*, *M.A.*, *U.S.*).
- When proper and plural nouns end in an S, add an apostrophe at the end (e.g., *Sally Jones' red stapler has been stolen.*)
 - Possessive singular nouns ending in S require an apostrophe before the S (e.g., *The witness's testimony*).
- Capitalization is unnecessary if the title is informal, appears without a person's name, follows a person's name or is set off before a name by commas.
 - **Correct:** David Culbertson, president and chief executive officer, spoke at the conference.
 - **Correct:** Chief Executive Officer David Culbertson spoke at the conference.
 - **Correct:** Our chief executive officer spoke at the conference.
 - **Correct:** Our chief executive officer, David Culbertson, spoke at the conference.

Visual Identity

Our logo is the most concise statement of the CSI brand and one of our most valuable assets. Our logo ensures that our audiences immediately recognize our communications.

We have intentionally crafted our identity to highlight our bold mission and refined focus on delivering comprehensive solutions and open technologies that empower banks to achieve their goals.

The use of dark blue represents a deep well of knowledge, authority and reliability. The vibrant oranges in our flags stand for optimism, energy and positivity. At the core is bright red, depicting vigor, passion and health.*

***Fun fact: Our CSI red was pulled from a previous version of the CSI logo, reflecting that even through change, at our core, we hold true to our roots.**

Corporate Logo

Clear Space

In order to maintain consistent legibility, always preserve minimum clear space around the CSI logo. The goal is to add a barrier against any conflicting visual elements that may diminish the impact of the mark.

A good rule of thumb is to always maintain space around the logo equal to the height of the “I” in our wordmark. Clear space amount should increase relative to the size of the overall logo.

Minimum Size

To maintain legibility at smaller scales, our logo should never be smaller than .75" wide for print, and 65 pixels when used for digital.

Digital: 65 pixel width
Print: .75" width

Color Variations

Clarity and contrast are crucial when placing our logo on a background. If your background is dark, use the version with white lettering. If your background is light, use the version with the CSI Blue lettering. If the background is a medium tone or bright color, use the one-color version.

If in doubt which version is appropriate, use “the squint test.” The most legible version of the logo—while squinting—is the version that has the best contrast. When determining which logo to use on your background, be sure to look at the logo as a whole and not just the lettering.

In instances where you can’t properly reproduce the primary logo due to printing or design restrictions, use the one-color version of the logo.

No exceptions to these rules are allowed without prior written approval from the CSI marketing department.

Primary Usage

Full-color logo on light background

Full-color logo on dark background

Secondary Usage

One-color logo on light background

One-color logo on dark background

Incorrect Usage

Since our logo should be immediately recognizable to our audience, never alter the color, add outlines and effects or rearrange the logo elements.

Never change the size or position of any elements in our logo. Treat the logo marks as one object. Be sure to always scale it proportionately, maintaining the shape of the icon.

Do not display on distracting patterns or bright colors.

Do not ignore clear space rules.

Do not rotate or skew our logo in any way.

No exceptions to these rules are allowed without prior written approval from the CSI marketing department.

⊗ Do not add other CSI brand colors.

⊗ Do not squeeze or stretch the logo. Always scale it proportionately.

⊗ Do not apply the logo to a pattern or bright background with little contrast.

⊗ Do not use the logo within a shape when applying it to a colored background; request a transparent gif or png format that will allow the background to show through.

⊗ Do not change the size or order of elements; treat the components as one unit.

⊗ Do not rotate the logo.

⊗ Do not use the logo without the proper clear space.

⊗ Do not use the symbol or wordmark alone. Both elements should always appear together.

Primary Color Palette

Our primary color palette utilizes a minimal range of four colors. Use them strategically and in moderation. To maintain the integrity of the palette, avoid combining large areas of multiple colors on the same page.

Shades and Tints

To optimize contrast of brand colors in design, shades and tints—mixing a hue with black or white—can be used with the primary colors.

Shades and tints of colors in the primary palette should only be used in addition to the color at 100% saturation of the hue. The primary palette, however, should always be dominate.

Backgrounds may also use white (#ffffff) or light gray (#f8f8f8).

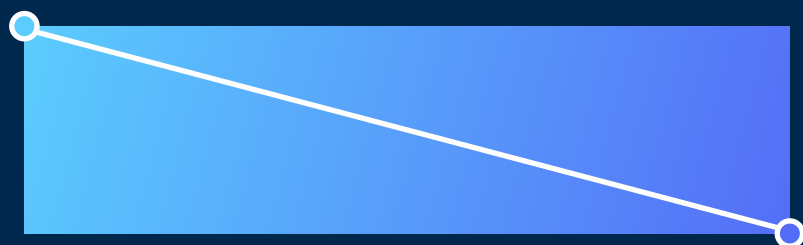

CSI Navy	CSI Orange	CSI Red	CSI Gold
PMS 282 c100 m86 y41 k42 r0 g39 b76 #00274c	PMS 179 c0 m79 y100 k0 r241 g93 b34 #f15d22	PMS 185 c1 m97 y90 k0 r235 g42 b46 #eb2a2e	PMS 144 c0 m48 y100 k0 r248 g151 b29 #f8971d
#061e37	#b54726	#b12324	#b97119
#335370	#f47e4d	#f05658	#f7ad4d

Gradients

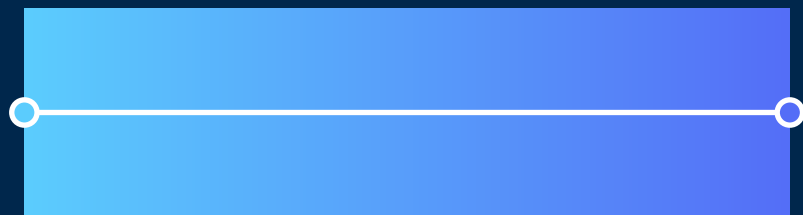

We utilize a minimal palette of four gradients.

They should be used strategically and in moderation. To maintain the integrity of the palette, avoid combining large areas of multiple gradients on the same page.

There are two preferred directions the gradient bar can be alternated and used:

Top Left > Bottom Right Corner

Left > Right

Due to the limitations of the color gamut of print, gradients should primarily be used on digital pieces.

Sunrise	c0 m48 y100 k0 r248 g151 b29 #f8971d	c1 m97 y90 k0 r235 g42 b46 #eb2a2e

Typography

Fonts

Proxima Nova

Our main typeface is Proxima Nova. It was chosen for its bold legibility and clean rendering in both digital and print environments. Proxima Nova is available as a web font via Adobe Typekit.

If the company name must be represented in plain text, Proxima Nova is the preferred typeface. If unavailable, a suitable fallback would be Helvetica Neue or Arial.

EXTRA BOLD/EXTRA BOLD ITALIC

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890!@#\$%^&*()-_+=

AaBb

REGULAR/ITALIC

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890!@#\$%^&*()-_+=

AaBb

Proxima Sera

Proxima Sera is a font that is flexible enough to be used in a variety of formats and styles, from print to digital work. Use Proxima Sera sparingly and only to emphasize a single word or phrase within a headline.

BOLD/BOLD ITALIC

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890!@#\$%^&*()-_+=

AaBb

REGULAR/ITALIC

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890!@#\$%^&*()-_+=

AaBb

Alternative Typography

Montserrat and Times should be used by desktop users and administrative personnel who create communications developed in e-mails and Microsoft Office® applications and for whom acquiring Proxima Nova and Proxima Sera through Adobe Typekit is impractical. While less desirable than Proxima Nova and Proxima Sera, Montserrat and Times represent a minimum standard that is not burdensome, as they are free to install on all PC and Mac computers.

Pairing Examples

Montserrat (sans serif) and Times (serif)

ASK A FINTEPERT

High tech,
meet high *touch*.

Modern software & open technologies that help you rival the competition — without sacrificing service.

Proxima Nova (sans serif) and Proxima Sera (serif)

ASK A FINTEPERT

High tech,
meet high *touch*.

Modern software & open technologies that help you rival the competition — without sacrificing service.

Hierarchy

It is important to use proper hierarchy when displaying groups of information. Here we have the collection of style tags that are the foundation of the website build. There may be instances when further hierarchy is needed to distinguish certain information or content, but this range is enough to create clear distinction between the character styles.

Additional distinctions can be made by stacking Div classes that change the H-Values color, case or style. For instance, H3 Header could also be assigned the color CSI Orange, with a Bold-Italic class for infographic treatment.

Font = Font Family = Proxima Nova, Helvetica Neue, Arial, sans-serif

H-Values (All units specified below are in pixels)			Desktop		Mobile

		Text Transform	Capitalize	Letter Spacing	50	Letter Spacing	50

Button Styles and Links

CTA language should be short and direct. Sentence case is used without end punctuation in all CTAs. Button color usage is limited to the colors you see on this page. The outlined and filled CTAs can be used interchangeably. However, when legibility is an issue (e.g. busy backgrounds), the filled CTA is preferred. The CTA button container can flex to accommodate longer copy but should retain the same corner radius and otherwise not be adjusted or altered. Text should be center aligned vertically and horizontally in all cases.

For links, use this reference as a guide when assigning a hyperlink in its parent character style.

Text & Guidelines

Font-family: Proxima Nova Extrabold

Capsule

Radius: 15 px (or half the capsule height)

Height: 30 px

Padding (on ends): minimum of 15 px (same as capsule height)

Stroke weight: 2 px

Outline button should only be used for large formats.

Iconography

The visual language of our icons plays an important role in the CSI product experience. They can convey more complex ideas or represent a simple action, helping users quickly connect concepts to their needs.

Approved icons can be found at the end of the corporate PowerPoint template.

- Don't use icons if they're not relevant to the text they're paired with.
- When scaling icons, line thickness should remain consistent for all icons shown as part of a group.
- The coloring of the icons can vary depending on the content, as long as they adhere to the CSI-approved palette.

Examples

Open Banking Stats Today

- 🔗 900,000+ API calls per day

API 1ST FOCUS ACROSS TEAMS

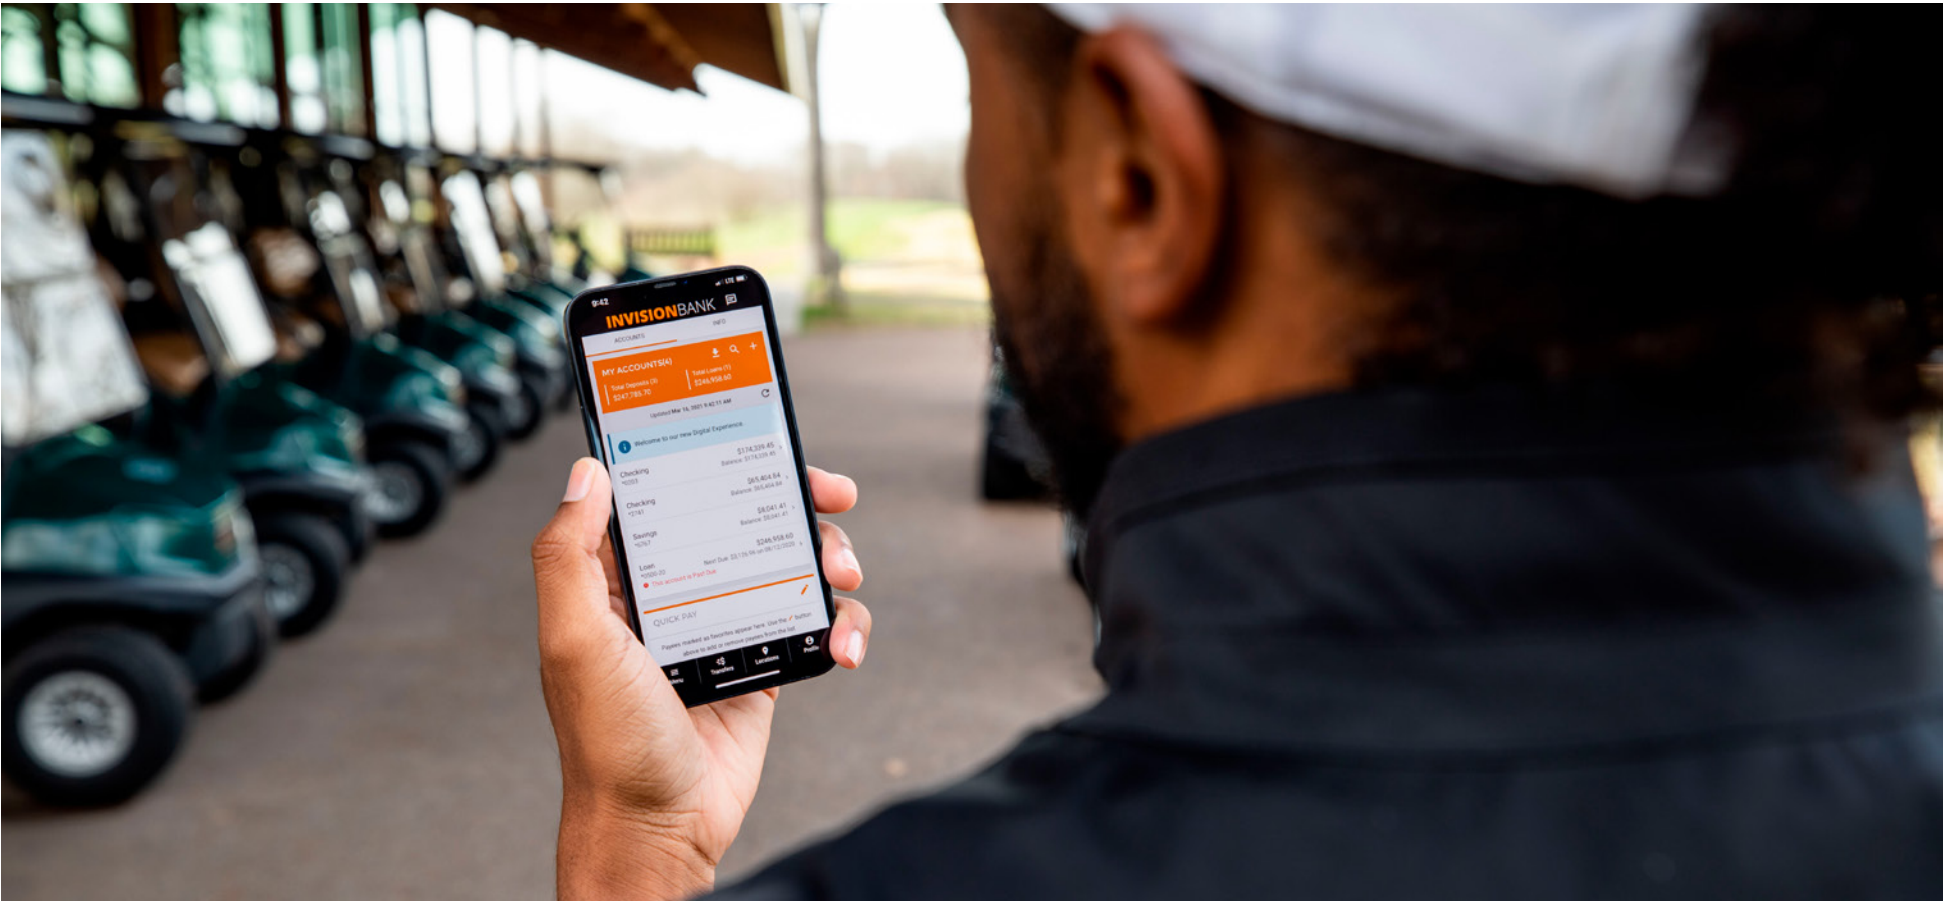

7 © 2023 Computer Services, Inc.

Photography

Photography should show depth and perspective to reflect the angles and distortions of the logo.

Subjects should have a crisp focus with high-contrast and punchy color effect to also reflect the energy of the CSI color palette.

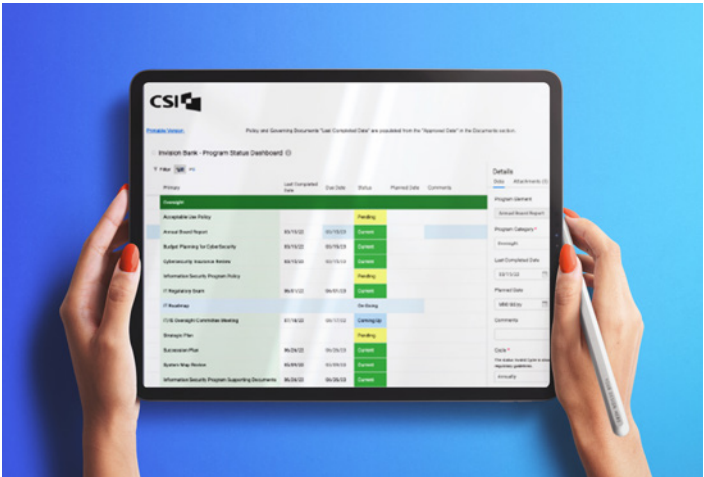

Do use original photos that feature our products (when possible).

Important note: For any images or video footage used in our communications, it is the user's responsibility to secure the necessary usage rights and ensure adherence to any restrictions or requirements for use.

Do use photos with interesting angles and modern elements.

Do use photos that feature our products and brand colors.

Photography

Photography should show depth and perspective to reflect the angles and distortions of the logo.

Subjects should have a crisp focus with high-contrast and punchy color effect to also reflect the energy of the CSI color palette.

Important note: For any images or video footage used in our communications, it is the user's responsibility to secure the necessary usage rights and ensure adherence to any restrictions or requirements for use.

Do use photos that show people looking natural and having fun.

Do use original photos that showcase our solutions.

Do use photos with elements of orange (when possible).

Photography

Photography should show depth and perspective to reflect the angles and distortions of the logo.

Subjects should have a crisp focus with high-contrast and punchy color effect to also reflect the energy of the CSI color palette.

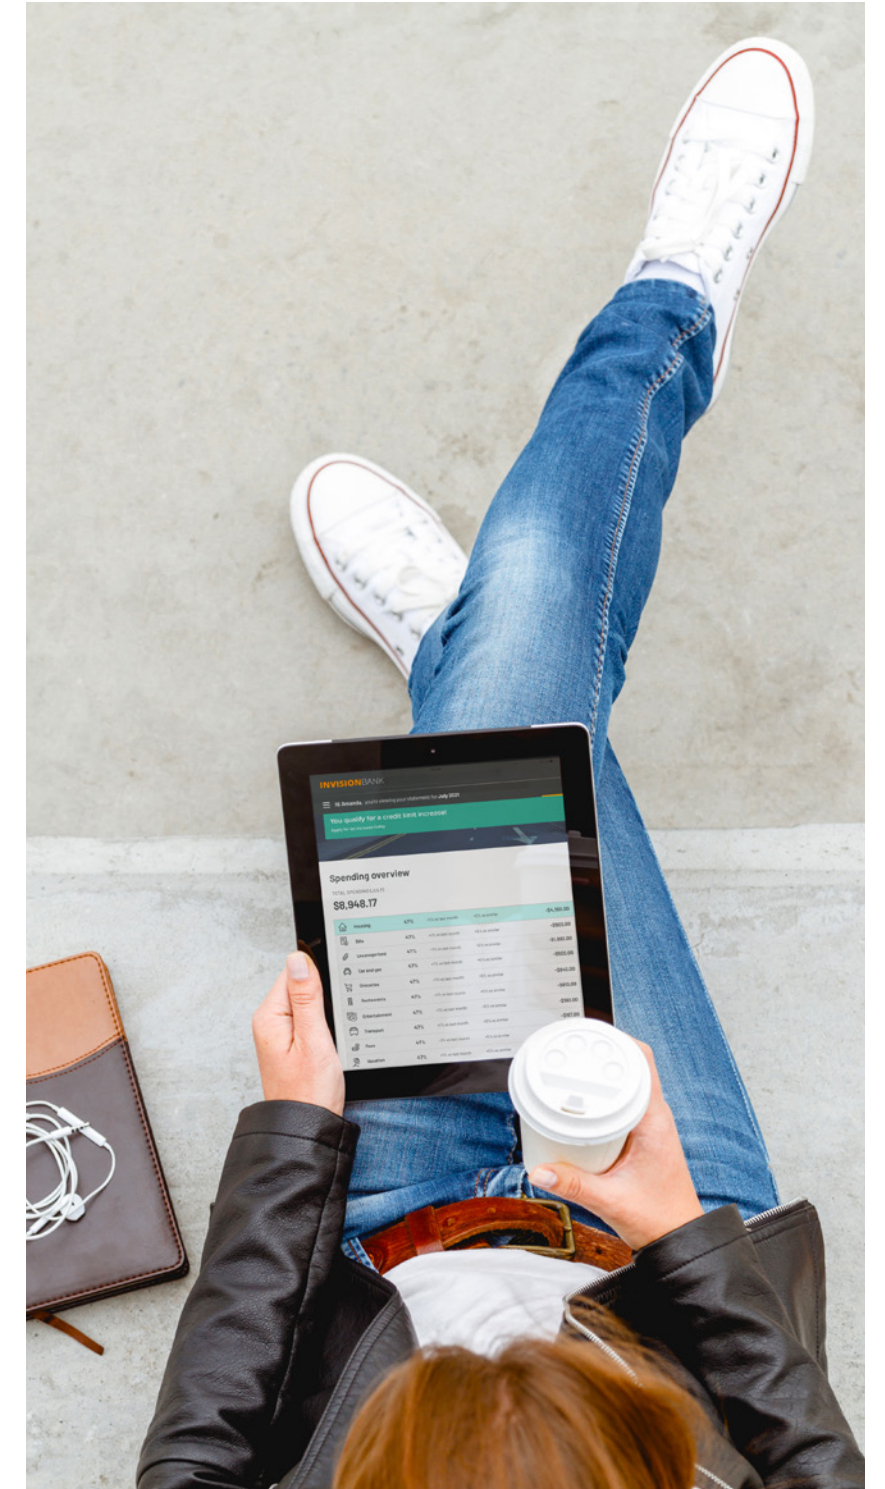

Important note: For any images or video footage used in our communications, it is the user's responsibility to secure the necessary usage rights and ensure adherence to any restrictions or requirements for use.

Do use photos that show diversity.

Do use photos with modern elements and interesting subject matter.

Do use photos that show our products and use interesting angles.

Photography

Photography should show depth and perspective to reflect the angles and distortions of the logo.

Subjects should have a crisp focus with high-contrast and punchy color effect to also reflect the energy of the CSI color palette.

Avoid

- Staged interactions and bland color
- Clichéd scenarios or contrived settings
- Staged interactions
- Obvious posing

Important note: For any images or video footage used in our communications, it is the user's responsibility to secure the necessary usage rights and ensure adherence to any restrictions or requirements for use.

Do not use photos that look contrived.

Do not use AI-generated photos that look fake.

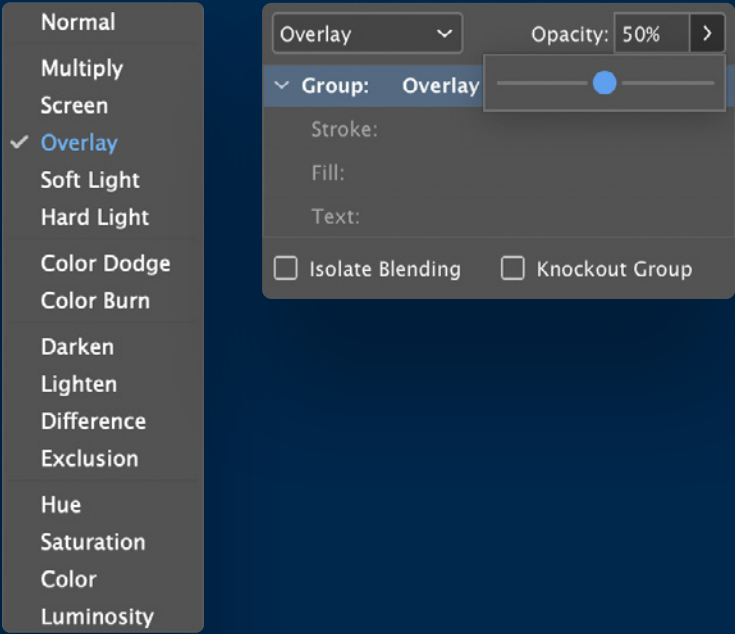

Do not use imagery that looks staged or posed.

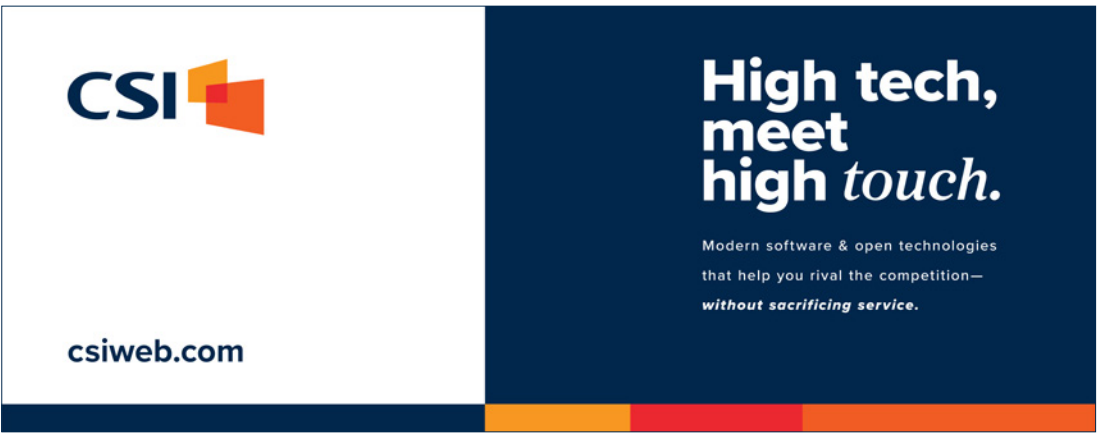

Graphic Elements

The shapes of the logo’s mark can be subtly overlaid on top of photos with CSI’s “line element.” Through a series of adjustment layers, tweak the contrast and opacity to ensure the photographs shine through.

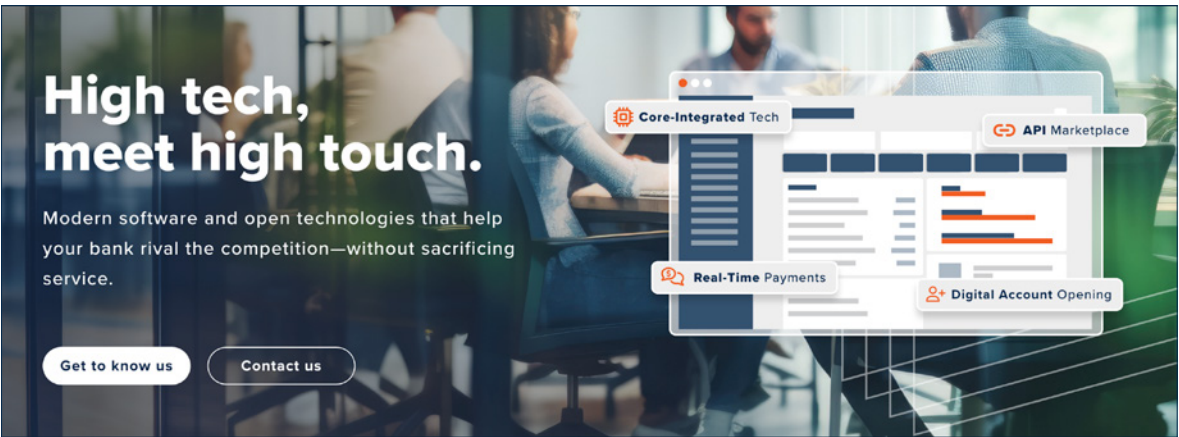

In “Blending Mode” options, set the line element to “Overlay” to best achieve this effect, and simply adjust the opacity to 50%.

Title slide for a PowerPoint presentation

Sales sheet with the CSI color bar

Presentations

Our CSI PowerPoint template should be used for both internal and external presentations. Various resources, such as icons, color palette and an editable U.S. map, are included with the template.

Presentations should use the Montserrat font family since our corporate font, Proxima Nova, is not installed on most computers.

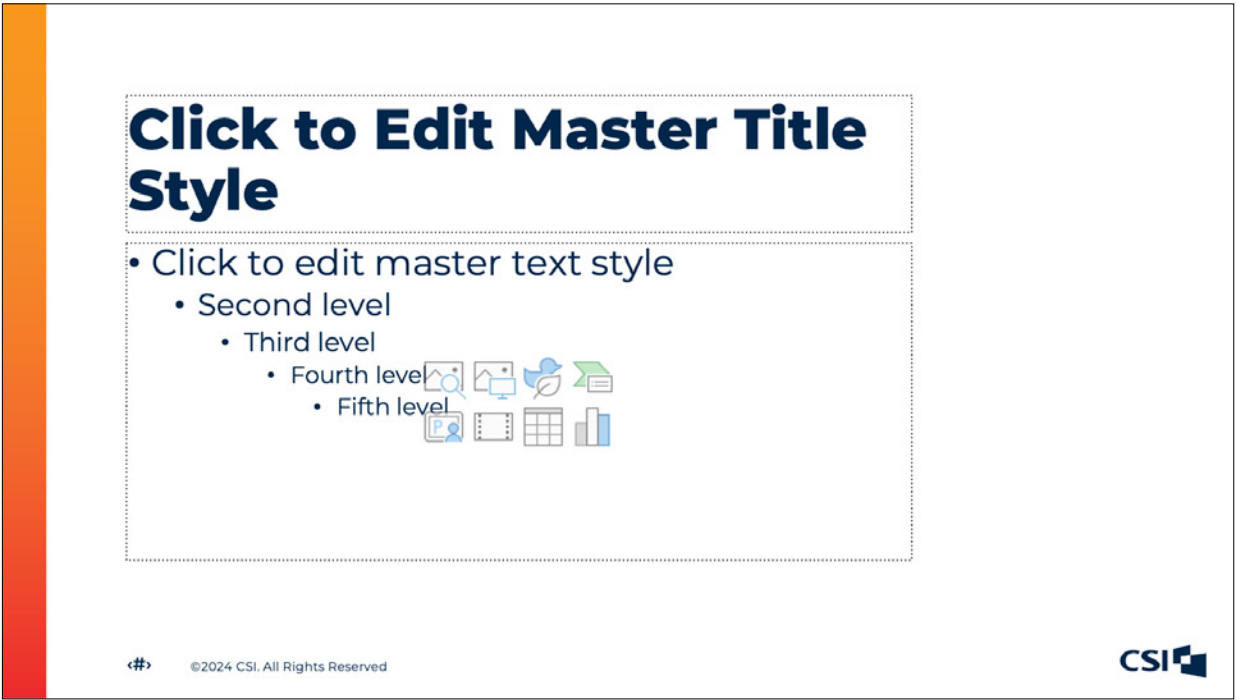

While using the presentation template, please remember:

Keep it simple. Include only critical information on the slide and speak to the rest of the information. Do not just read the slide to the audience...they can read on their own.

Use limited bullet points. Any more than 4-6 bullet points may be too many. Hit the main points and move on. If you have many more than this, consider dividing them into multiple slides.

Less is more. Consider an impactful phrase, quote or image to sum up an idea and speak to the idea while presenting the slide.

Whitespace is your friend. Your slide should not be packed full of content. Keep your slides clean and simple, which does not mean plain (or easy). Use text, graphics and images to maintain balance and hierarchy on your slides.

Email Signature Template

All CSI email communications should be concluded with an email signature in this format.

Do not resize, reorganize or otherwise alter the layout of the official CSI email signature.

Instructions for customizing your Outlook signature:

Located in the CSI Brand Toolbox on MyCSI, the Email Signature Generator (shown above, left) will generate an email signature for you. Fill in the form fields, and then copy the signature and paste it into your Outlook or phone signature area.

Note: Per the CAN-SPAM Act, the opt-out link and a full address MUST be visible in ALL emails from Sales and RMs to customers/prospects.

PC computers

1. Click “New E-mail” icon under “Home” tab.
2. Click the “Signature” icon, and then select “Signatures...” from the drop-down menu.
3. After creating an email signature using the Email Signature Generator (requires CSI Network or VPN) found on myCSI in the Brand Toolbox, copy and paste the Displayed Result into Outlook’s Signature preview window.
4. Replace the sample copy with your own information.
5. Click “OK” and open a new email to view your new signature.
6. Test it with a friend so you can make sure it works as intended.

Apple computers

1. Click “New E-mail” button in the upper left corner of your Outlook page.
2. Click the “Signature” icon at the top right, and then select “Manage Signatures” from the drop-down menu.
3. Select the “+” button in the Signature Name window to add a new signature.
4. After creating an email signature using the Email Signature Generator (requires CSI Network or VPN) found on myCSI in the Brand Toolbox, copy and paste the Displayed Result into Outlook’s Signature preview window.
5. Replace the sample copy with your own information.
6. Save your signature and close the window, then open a new email to view your new signature.
7. Test it with a friend so you can make sure it works as intended.

Co-branding

Co-branding conveys a partnership between CSI and another company and represents an exchange of credibility between brands. We use co-branded logos where both brands have ownership, such as a collaborative whitepaper or presentation related to our partnership.

Before you use a co-branded logo, it is your responsibility to obtain and understand the right permissions from CSI and the partner or customer.

Use these guidelines for details on how and when to incorporate CSI co-branding logos into your branding and messaging.

Lockup Options

There are two lockup possibilities with co-branded logos, and the lockups you create depend on the shape of the partner’s logo and its brand standards.

There might be only one version that works with both logos, or both could be options.

Lockup A: Horizontal lockup

Place the CSI logo next to a long, horizontal partner logo.

Lockup B: Vertical lockup

Place the CSI logo next to a stacked or square partner logo. Use lockup B when the partner’s logo is square or stacked.

Note: Always maintain a minimum clear space around the CSI logo equal to the height of the “I” in our wordmark. Clear space amount should increase relative to the size of the overall logo.

If you have any questions regarding application or guidelines,
